

OrthoLine™ Acetabular Fracture System and Locking Drill Guide

Product Highlight

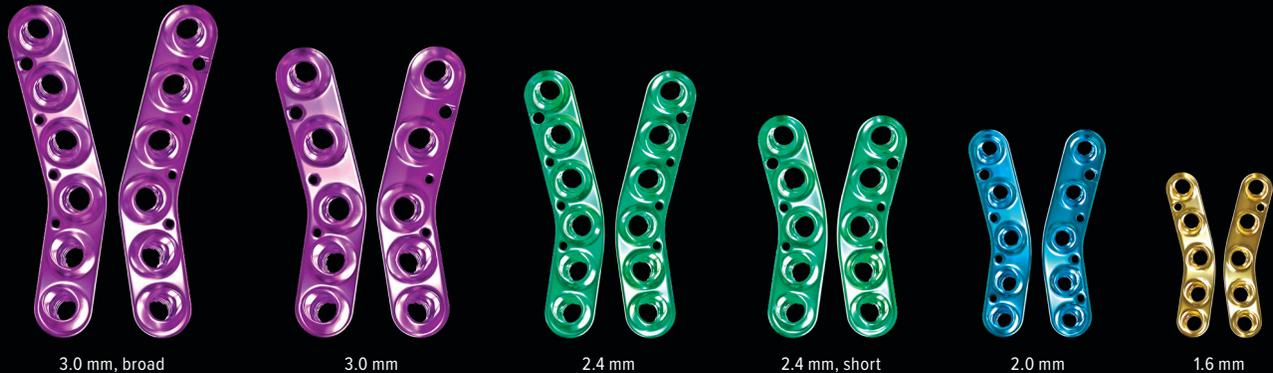

Arthrex®
Vet Systems

Driving Innovation in Acetabular Reconstruction

Key Features and Benefits

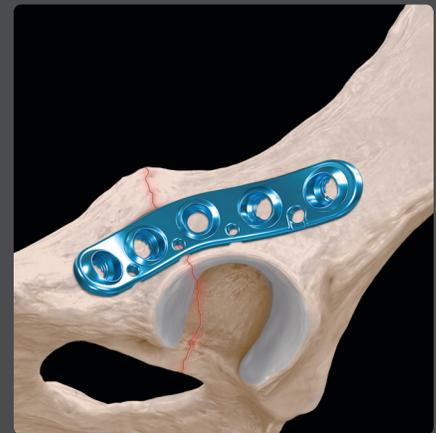

- > Anatomically precontoured plates reduce operative time
- > Defined screw trajectories maximize bone purchase and minimize pullout
- > Dedicated suture holes aide in soft-tissue management and closure
- > Hooded screw holes increase thread engagement and minimize soft-tissue irritation

Cranial

Central

Caudal

Locking Drill Guide

1.6 mm, 2.0 mm, 2.4 mm, 3.0 mm

The extended-length locking drill guide is designed for precise screw placement in challenging, hard-to-reach anatomic regions.

This description of technique is provided as an educational tool and clinical aid to assist properly licensed medical professionals in the usage of specific Arthrex products. As part of this professional usage, the medical professional must use their professional judgment in making any final determinations in product usage and technique. In doing so, the medical professional should rely on their own training and experience, and should conduct a thorough review of pertinent medical literature and the product's directions for use. Postoperative management is patient-specific and dependent on the treating professional's assessment. Individual results will vary and not all patients will experience the same postoperative activity level or outcomes.
