OPPORTUNITY FOR EQUINE SURGICAL RESIDENTS AND SURGEONS:
EQUINE LAPAROSCOPY
LEARN MORE ABOUT LAPAROSCOPY AND GET EXPERIENCE
SATURDAY / SUNDAY, 6 / 7 OCTOBER 2018

Join us in this unique laparoscopy course and take advantage of the knowledge, experience and skill of renowned international Faculty members. This Equine Laparoscopy course with its theoretical and hands-on training of all essential and advanced laparoscopic surgical skills is aimed and specially designed to supplement the residency program. Using black boxes and pelvitrainers, you will learn and practice extracorporeal knotting techniques as well as intracorporal suturing, ovariectomy, closure of the nephrosplenic ligament and closure of a bladder rupture. The inguinal area, epiploic foramen approach and diagnostic approaches to the equine abdomen will be taught in class.
In a first-of-equine surgery set-up in Europe, there will be the opportunity to practice with virtual reality simulator. This provides a challenging, safe and controlled environment to master the basic skills needed to perform laparoscopic surgery.
At the end of the course will be a demonstration of a laparoscopic procedure on a live horse. This intensive course covers the core laparoscopic surgery skills and knowledge essential for every surgical discipline under guidance of experienced equine surgeons.

MODALITIES OF LEARNING:

2 DAYS / 12 HOURS OF PRESENTATIONS, 4.5 HOURS OF HANDS-ON PRACTICAL TRAINING, 1 DEMONSTRATION

PRACTICAL HANDS ON TRAINING:

1. Explanation of the equipment
2. Handling instruments
3. Blackbox: Extracorporal knotting
4. Blackbox: Paprika: Pepper seeds
5. Virtual reality training
6. Blackbox: Intracorporal suturing (bladder)
7. Blackbox: Ovariectomy using Ligasure
8. Blackbox: Nephrosplenic space closure using barbered suture
AT THE END OF THE COURSE EACH TRAINEE SHOULD BE ABLE TO:

- Develop hand-eye coordination, manual dexterity, depth perception and translation of 2D image to 3D working environment
- Effective equipment and instrument use and ergonomic principles
- Tie a laparoscopic surgeon’s knot
- Handle a needle intracorporeally and take bites from tissues
- Be able to do interrupted and continuous suturing with good soft tissue approximation
- Ligate a bleeding vessel
- Perform laparoscopic ovariectomy in a blackbox

FACULTY

Dean Hendrickson DVM, Prof. Dr. Dipl. ACVS
Timm Gudehus DVM, Dr. Dipl. ACVS/ECVS
Michael Röcken DVM, Prof. Dr.
Max Diekstall DVM, Resident ECVS
Astrid Rijkenhuizen DVM, Prof. Dr. Dipl. ECVS, Dipl. RNVA
Sabine Kärstner DVM, Prof. Dr. Dipl. ECVAA

TERMS AND CONDITIONS

Price 1750 Euro incl VAT
