The New Canine Arthroscopy System

This small compact tray system fits in smaller autoclaves and includes a larger pin mat area in the bottom of the tray for storing extra hand instruments. Hold more probes, meniscal knives, and Arthrex arthroscopic hand instruments using this new, well-organized system.
Stop by the Arthrex exhibit during the 2018 ACVS Surgery Summit to see the new compact Canine Arthroscopy System.

October 25-26
Arthrex Booth #303
Phoenix Convention Center,
Phoenix, AZ
